

Lecture 3

Saturday, 19 April 2025

21:04

Agenda

- 1) db
- 2) CRUD
- 3) bms clone } blueprint

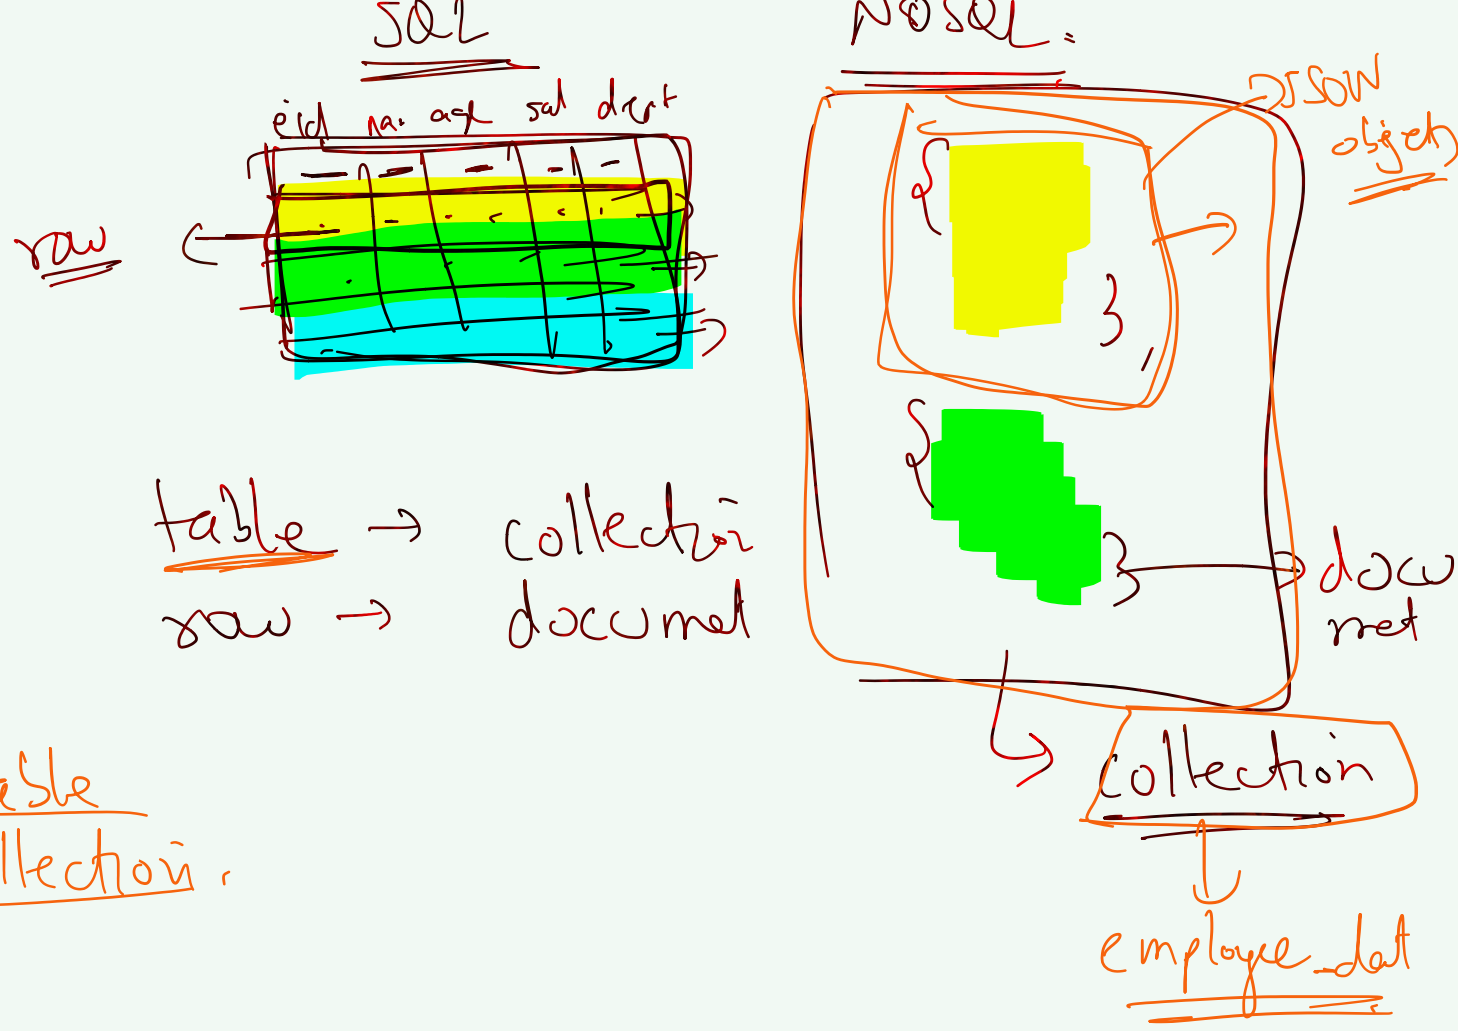

Why db?

store
retrieve
update
search → indexing
validation → (field cannot be empty)

age > 18

Mongo db

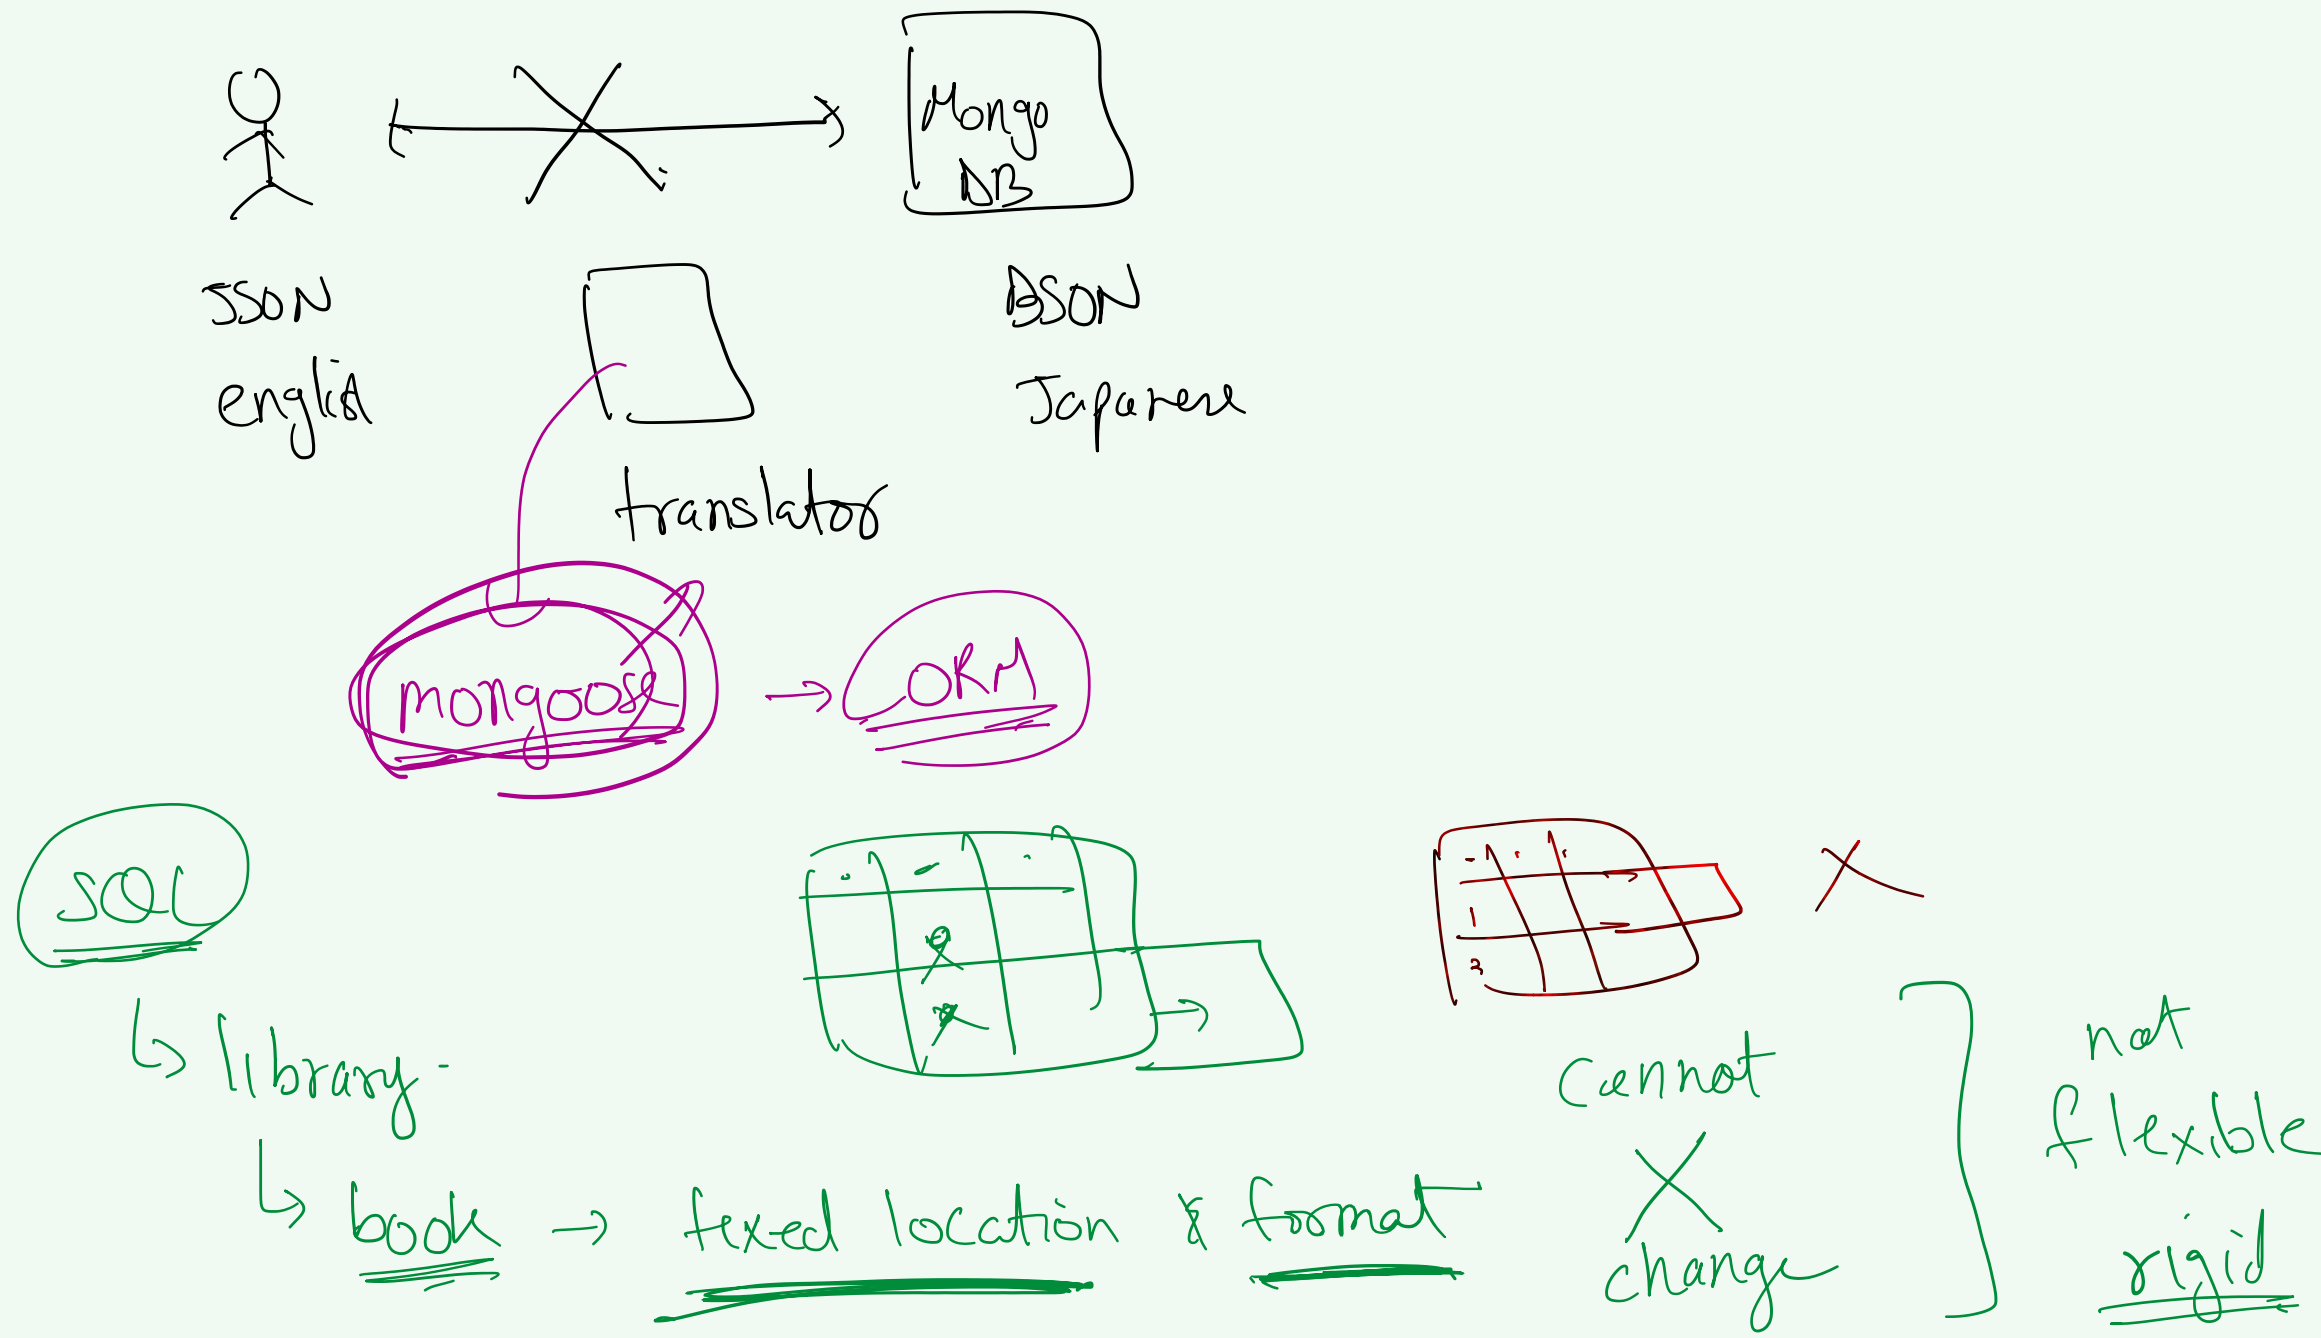

- a) NoSQL
- b) doc-based
- c) open-source db

group of rows → table
docs → collection

Mongo db stores data in BSON (Binary JSON)

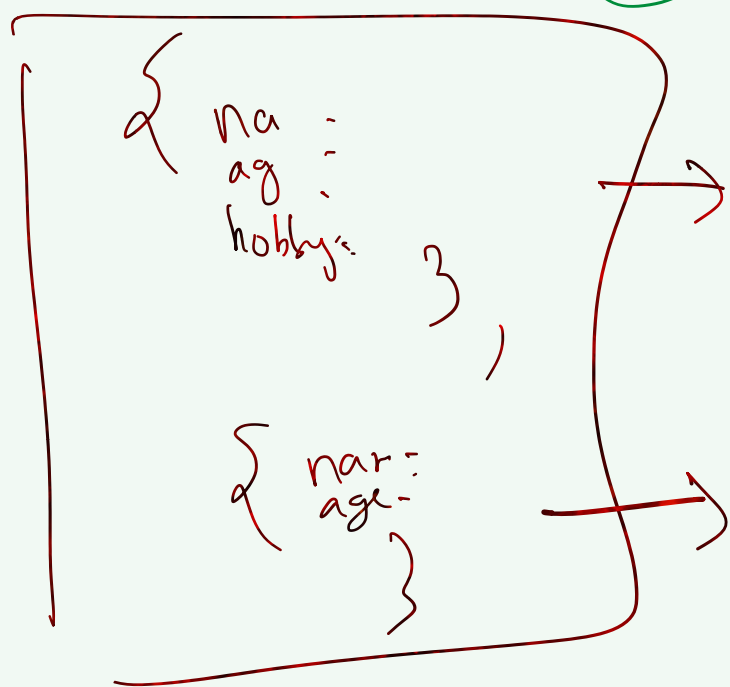

- a) compact
- b) fast for comp to process

Mongo DB
kids play over
haphazard manner

flexible

unstructured
semi-structured

E-commerce

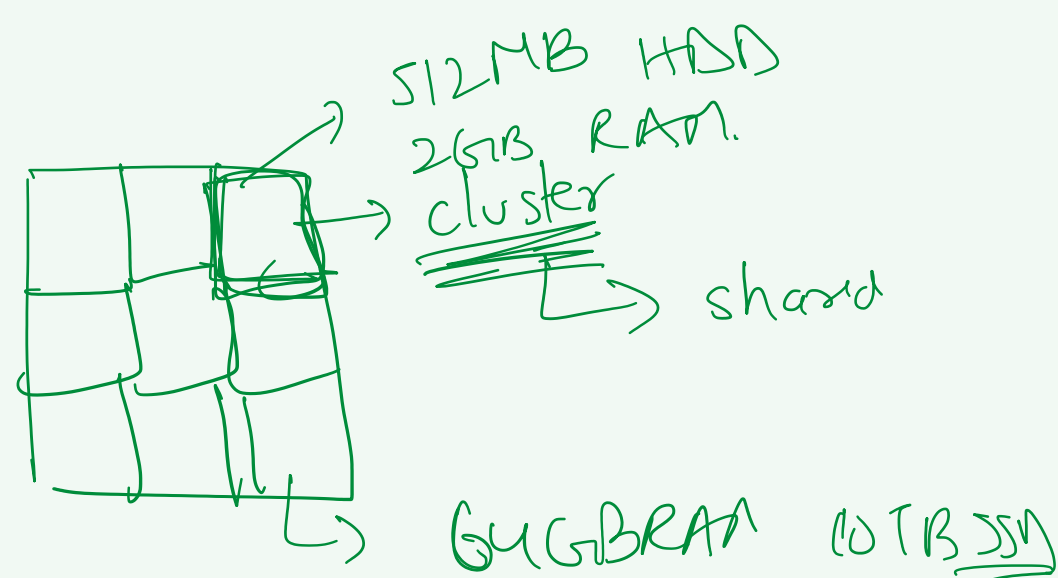

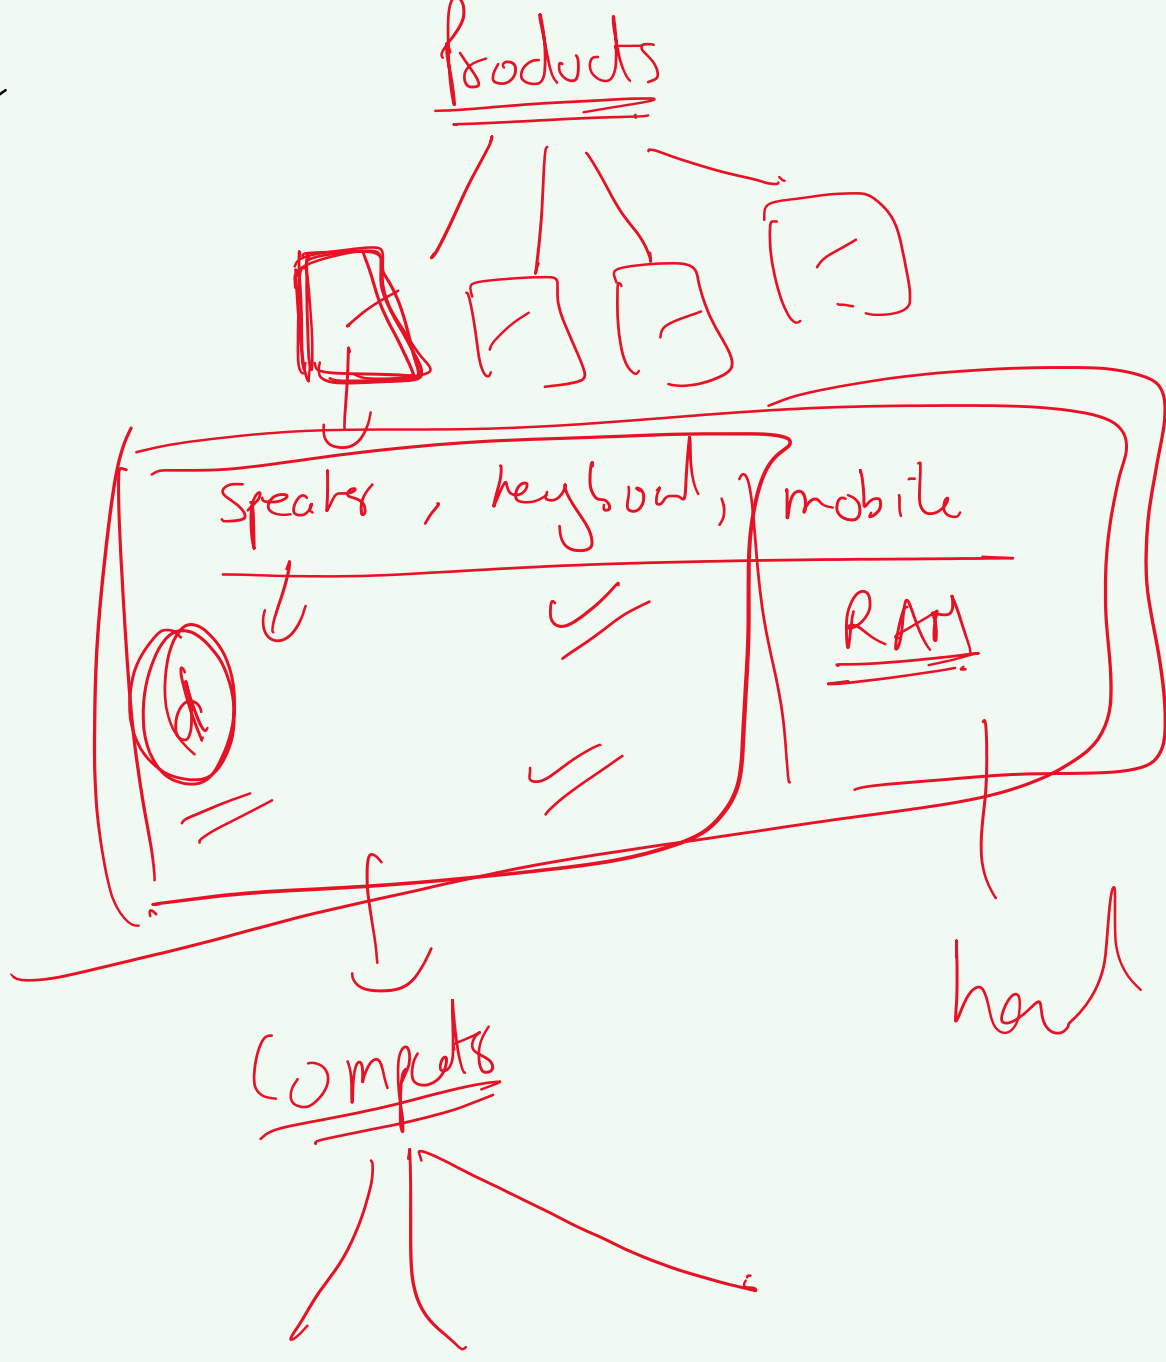

Product table

id	dept	colour	weight	ext	RAM	ITM	Camera	Material	mo
1	elec	black	-	-	4GB	-	-	cotton	X
2	app	blue	-	-	X	X	X	X	256
3	dt	white	-	-	X	X	-	-	-

3x10 = 30 Cells = 105 cells

3rd

NoSQL

MongoDB

Atlas

cloud service

connect using connection string
